

...for the long haul

TRUCK ENGINEERING FIT-OUT & REPAIR

END TO END SOLUTIONS

TRT is well known for the quality of their design and build trailers, bespoke engineering projects and smart innovative solutions.

TRT's manufacturing philosophy focuses on in-house delivery of all aspects of a truck and trailer build or repair. This is a result of TRT's more than 50 years of industry knowledge and a team of dedicated experienced design, fabrication and repair specialists.

TRT has end to end solutions and fully integrated, in-house capabilities that deliver cost-effective options with quality outcomes expected by OEM's. From single operators to large fleets, we ensure the quality of all fit-out requirements, from 5th wheels and guards to chassis modifications and hydraulics.

From change of use requirements to a new tractor unit fit-out, our wide range of services, brings real peace of mind for customers and OEM vehicle suppliers. All work carried out is expertly completed by one team, in one location, to the highest standard of workmanship.

OEM TRUCK FIT OUTS NEW & USED

The team at TRT continue to design and manufacture some of the most technically innovative trailer solutions in the industry - and not only in New Zealand. This depth of engineering design, knowledge and experience puts TRT in the unique position to offer a range of OEM truck Fit-out services from electronic integration to deck and chassis design and build, that most would have to outsource to contractors.

Truck fit outs are delivered in-house, under one roof, by one team managing quality and on-time delivery. An extensive range of parts is carried in-house, with our NZ wide parts supply operation, helping to reduce delays and downtime in the supply chain, with stock on hand.

TRT has a dedicated, experienced team that focuses on fit outs for trucks and trailer units from heavy mechanical engineering through to hydraulics. We are fit out experts and have experience across most OEM brands.
